REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention, specifically silica, alumina, silicates, or aluminosilicates that have been doped, the dopant being present from 1 to 1000 ppm. Of the closest prior art of record, U.S. Patents 6,616,910; 6,284,218; and 4,539,191 disclose doping an adsorbent material of the type claimed, but teach the use of dopants that are not disclosed in the instant claims. U.S. Patents 5,635,196 and 4,296,083 disclose the claimed dopants, but in considerably larger amounts than claimed. The instant specification describes on page 2 the advantage to doping the adsorbent material to enhance its odor controlling properties. On page 4 the instant specification describes the advantage to the amount of doping agent applied to the adsorbent material, and the Remarks Made in an Amendment dated 14 May 2002 and 26 December 2002 describe that an excess of doping agent would interfere with the adsorbent properties of the doped material. The prior art of record therefore does not anticipate or fairly suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
